Strut 600

## INSTALLATION EASYGRID

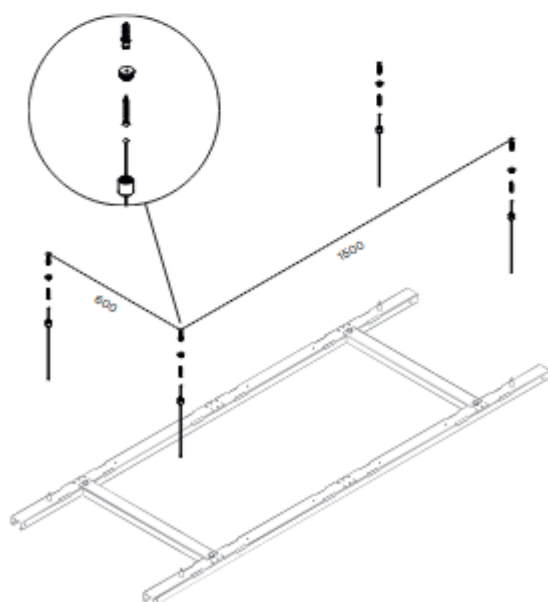

- ① Mount the cable grippers on the carriers.

- ② Place the struts between the carriers and mount them.

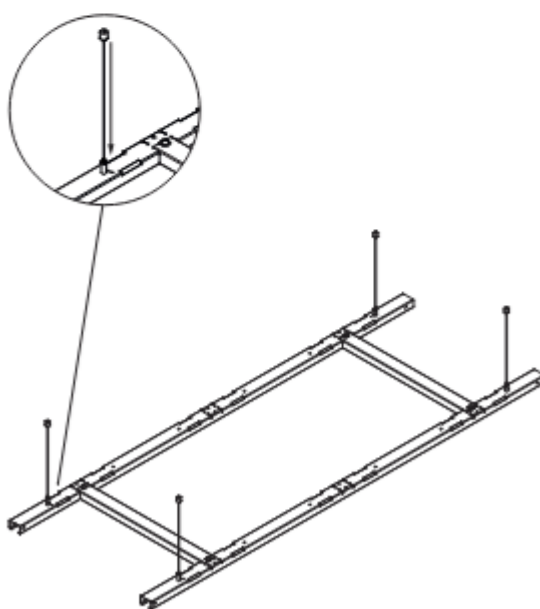

- ③ Determine the position on the ceiling and mount the ceiling mounts.

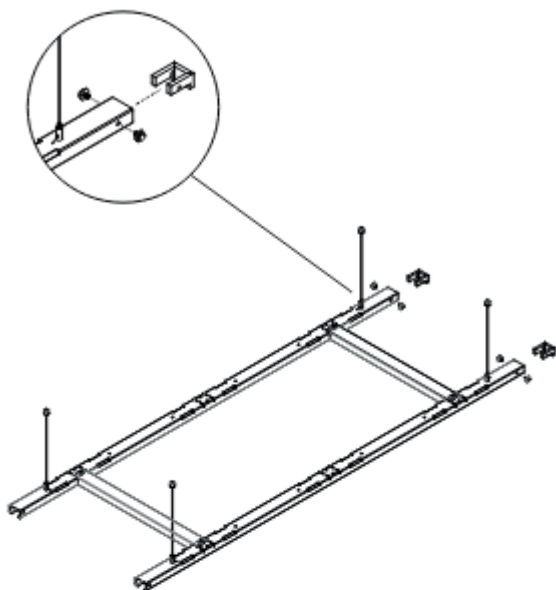

- ! Make sure you use the correct kind of mounting materials for the ceiling material.

- ④ Insert the wire into the cable gripper and hang the grid at the desired height.

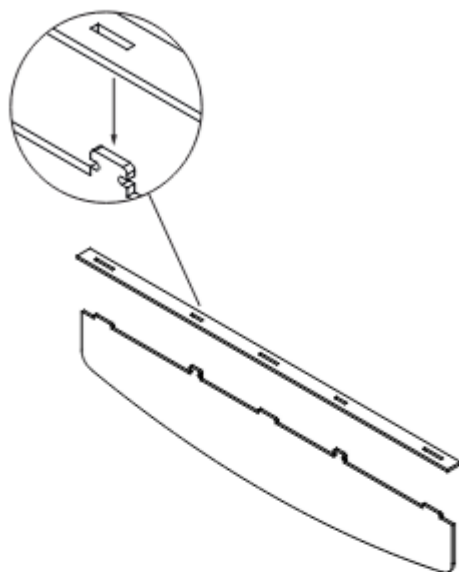

Make sure the grid is level.

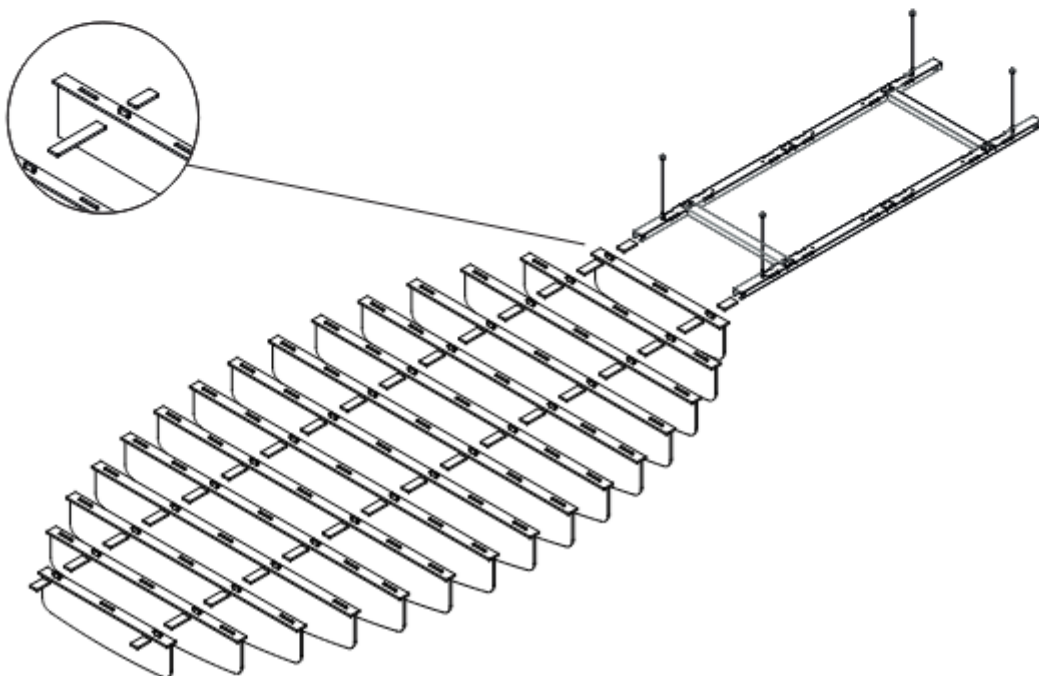

① Install two of the end caps to one side of the EasyGrid.

② Assemble the baffles.

③ Slide in the baffles starting with an end spacer and next placing a spacer in between each baffle. Finish with an end spacer.

- ④ Install the remaining end caps on the other side of the EasyGrid.
